RE: The Castle Mountain Earthquake Fault in Houston, Alaska

Dear Mayor Menard,

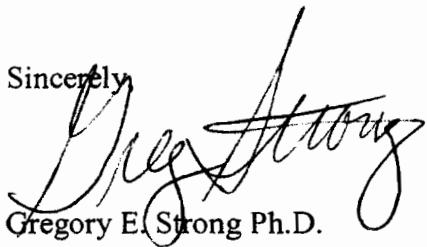

At last week's Assembly Meeting you were provided with an "Evaluation Matrix" for the proposed routes for the Port MacKenzie Rail Extension Project (Exhibit A). The Matrix reviewed ten (10) categories for eight (8) proposed routes. A map reflecting each of the proposed routes is included (Exhibit B).

What is of concern, and the reason for this letter is that the status of the sub surface geologic estate is NOT part of the Evaluation Matrix. The proposed Houston South route runs perfectly parallel for its entire length of travel with the Castle Mountain Earthquake Fault (Exhibit C). Let me be clear, we're not talking about the proposed rail line merely crossing the fault, but rather the proposed route runs directly on top of or directly along side of the fault from the Susitna River to the Parks Highway. Dr. Peter Haeussler of the USGS states that this fault could fail at anytime with an expected 7.2 magnitude earthquake.(1) This fault line has failed every 650-700 years for the last 2500 years. The last time this fault line failed was 650 years ago.

The construction of a portion of a quarter of a billion dollar rail project paid for with taxpayer dollars on top of a known, well documented and well studied earthquake fault is something prudent officials, such as your self, should avoid.

Even minor quakes could create frequent rail alignment failures resulting in numerous, expensive derailments. Before this process gets passed along to persons in Washington D.C. with the Surface Transportation Board, let me urge you to remove from consideration the Houston South route as it is certainly not a safe, viable, commercial transportation route.

Sincerely,

Gregory E. Strong

Gregory E. Strong Ph.D.

PORT MACKENZIE RAIL EXTENSION

LEGEND

Preliminary Alternatives*	● ARRC Milepost
Mac East	— ARRC Track
Mac West	— Highway
Conn 1	— Medium Rd.
Conn 2	— Minor Rd.
Conn 3	— Iditarod Trail
Houston	— City Boundary
Houston North	Proposed Prison
Houston South	Point Mackenzie
Willow	Correctional Farm
Big Lake	Park or Refuge

*These lines generally represent conditions which are subject to further refinement.

The map illustrates a proposed rail line from Anchorage to Point Mackenzie. The rail line originates in Anchorage, crosses the Chugach Mountains, and follows the Turnagain River through the Palmer area. It then turns inland, passing through Willow, Houston, and Big Lake, before reaching Point Mackenzie. The rail line is shown in various colors representing different preliminary alternatives (Mac East, Mac West, Conn 1, Conn 2, Conn 3). Major roads like the Seward Highway (Hwy 1) and Parks Highway (Hwy 180) are also depicted. The map includes a scale bar indicating distances up to 6 miles and a north arrow.
